THE SIMPLE GLICK OF A SHUTTER

Kodakery, unlike other diversions—or hobby if you will—is an all-the-year-round pastime, enjoyed by young and old, alike. By the simple click of a shutter, something of interest, something you wanted to remember always, is transformed into a permanent, photographic record, a sort of human interest diary.

CHAPTER VI.

A big man, past middle age, and seated astride a small white horse, came picking his way between the huge birch and maple trees, down through the quiet morning of the woods. He had shaggy red hair, and a big mouth that drooped at the corners. The little eyes, flashing sideways in search of the blaze on the trees, were sharp and calculating. Where the ridge sloped to the valley he reigned up.

"Must be somewhere about here," he mused aloud. "Don't know how I can miss seeing McTavish if he happens to be outside—land knows he's big enough to see—hello who are you?"

Something animated in the shape of a boy had stirred from a log directly in the path. Leading out it stood before the rider—a boy with long yellow curls and big brown eyes. The old white horse shied, and the boy rocked backwards and forwards on the path, voicing low, plaintive sounds. As the rider watched him a small animal crept from the thicket and climbed upon the lad's shoulder.

The horse reared, and the boy, lifting his brown arms, began to wave them to and fro. At the same time he broke into a wild, tuneless chant, the words of which were unintelligible to the wondering observer. It was a shrill, weird note, fluted and varying like the call of a panther. Suddenly boy and animal vanished as though the Wild had reached forward and gathered them into its arms.

"Heaven!" shuddered the man, and struck the horse sharply with his spurs. Where the trail curved off abruptly to the valley he reined up once more and turning about, looked back.

"Well I'll be shot!" he soliloquized. "No matter where you find the Creator's handiwork and beauty you'll find His imperfections too. Ugh! how those big eyes did probe me! It's enough to make a saint shiver, let alone a chap who has climbed up as I have—not caring who I've trampled on."

He shivered again, and felt in his pocket for his pipe. His hand brought forth a yellow wallet. A hard smile warped his mouth as he opened the wallet and drew out a small photograph. It was the likeness of a young woman with sweet face and great eyes. He tapped the likeness and a lock of brown hair leaped out like a snake and twined about his finger. He brushed it back with a shudder, and, snapping the case, put it back in his pocket.

"I'll find that big McTavish and get this deal closed," he mused as he rode along.

The horse stumbled and a grouse whizzed along the trail, passing close to the man's head, with a thundering, nerve-racking sound. He sat erect and sank his spurs into the old gray's heaving flank.

"Get up, you lazy old bag of bones," he commanded. "Let's find that big innocent and get hold of his deed. We'll give him a dollar or so to see us back along that lonesome trail. I wouldn't go back along that spooky path for all of old Halliburton's money. I've seen enough snakes and wolves and bears since two o'clock this morning to last me a lifetime. And that last animal—that crazy boy!"

He slashed the old mare into a faster walk and sat huddled up and pondering until a twist in the path brought an open glade into view. The buzz of a saw and the pant of a weary engine came to his ears like welcome music.

"Trotter!" he chuckled. "Let's see, Bushwhackers' Place lies just across from it. But there's the creek. Guess I'll have to ride down to the narrows."

Finally, with much grumbling, he reached the farther side of the creek, and, pulling in his horse, he gazed about him.

"Ha, look at that for timber!" he exulted. "And to think that Smythe and I will have control—"

He did not finish the sentence aloud but sat nodding his head up and down. Very soon he drew up before the long log-house. Big McTavish stepped out and pointed to a log-building in a grove of butternuts.

"Put your horse in there," he invited.

"I will, and more," agreed the arrival. "I'll enjoy a slice of bread and a slice of dried venison or anything else your larder affords. I'm hungry as old Nick."

"You're welcome to the best we

have," replied McTavish. "You're Mr. Watson, I suppose. Am I right?" "Watson I am—Robert W. O. Watson, that's me. I'm pretty well known through these parts; that is to say, better maybe a little east of here. This place is kind of off the map, you know. Just give the lady there, referring to the patient, stood that stood with drooping head and sanctimonious air, 'but you needn't be in any hurry to feed her. She's Smythe's horse and used to waiting.' 'I always see that my own get their meals same as I do,' said big McTavish. 'I wouldn't put just like eatin' unless they had their fodder, too. We'll step inside and I'll have Gloss fix you up a meal. She's down at the spring now gettin' the cream ready for the churnin', but she'll be back direct.'"

As they crossed from the stable a small form fitted by them and vanished among the trees. Watson gasped and he clutched McTavish's arm. "That's him," he cried, "that's the crazy boy I met a couple of miles away. How did he get here so soon do you suppose?"

"Oh that's Dave Davis," smiled McTavish. "Nobody knows exactly when he'll turn up. He runs like a deer and is as shy as the wild things he plays among."

"Plays among," repeated the other. He followed McTavish into the house and sat down heavily on a stool. "What do you mean by 'plays among'?"

"I mean that he moves among the wild things and they are not scared of him same as they are of you or me or anybody else. They do say that he can fondle the cubs of bears, and wolf-kittens. I've seen him playin' with a big snake myself—not a poisonous one, of course. Seems as though Dave can't be scared of anything. He's a real playboy, that's what he is. He's a real playboy, that's what he is. He's a real playboy, that's what he is."

"Humph," grunted the other. "I see you're a pious man, McTavish—good, good, and honest. Good plan to work along that line. Had a good bringing up myself. Mother's prayers, early teaching, and that sort of thing have a lot to do with making a big man. My mother is largely to credit for my success. She's dead now, poor old lady. Of course, a fellow who climbs has a right to some of the credit himself, I suppose. Made up your mind, I can see, to swap this forsaken wilderness for a piece of cultivated land," he said, abruptly opening the subject nearest his heart and fixing on the big man his little pig-eyes.

(To be continued.)

Furs and Crops

Destroying Moles in England to the Detriment of Crops

Any relation between women's fur coats and the alleged "world scarcity of wheat" would seem at first sight hardly less remote than Flullen's connection of Monmouth with Mace-don. It comes about in this way. At the present moment the commercial value of moles is greatly enhanced by the demand for their skins, now worth eighteen pence apiece, to make furs. As a result moles are being massacred so ruthlessly that in some localities they seem likely to become extinct.

A short time ago the board announced that the certificates would be redeemed at not less than 40 cents per bushel and that the first payment would be 50 cents. It is not yet definitely known whether a definite price has been fixed or if the redemption value of the certificates will be much in excess of the amount originally announced, namely, 40 cents a bushel.

Crop Prospects in Alberta

Alberta's Semi-Monthly Crop and Livestock Report

Conditions in Alberta in crop and livestock in mid-July are in line with the forecast of the early part of the month. Warm weather had set in at that time following a period of plentiful moisture. In contrast with the situation in the previous two weeks a suitable condition of the weather is prevalent throughout the province but there has been no interruption of adequate showers of rain to keep the crop in an absolutely good condition. The driest area for the previous period was in the district north of Lethbridge. The whole of Southern Alberta received on July 4th a night's steady rainfall totalling in most places about two inches. This shower is one of the outstanding features of the past fortnight and has had the effect of leveling up and correcting some of the inequalities of moisture distribution. Good rains have fallen in the centre and north.

The Cutworm Trouble Abated Spent The grasshopper area has in creased since last report. The parts of the province of the gain in growth north, south and west of Lethbridge, points along the MacLeod and Calgary line, particularly around High River, points along the C.P.R. for one hundred miles east of Calgary and an outbreak at High Prairie. Hoppers have appeared at Moncton also. The extent of damage is not great on the whole but has been sufficiently serious to affect single farmers with considerable losses.

There have been a few small areas visited by hail—the principal one being east of Macleod.

The prospects for heavy crops of hay, roots and garden products, are good. Potatoes were a little slow in starting but during the past ten days have improved remarkably. Taking the province as a whole the situation is better than it was two weeks ago by reason of the weather, through the accession of warm weather, and the concurrence of rains.

Livestock conditions are improving but the beef and stocker market does not look attractive to those farmers who have paid sixty dollars a head for feed to bring their stuff through the winter.

Wonderful Strength For Weak Stomachs

Everyone Talking About the Cures Made By Dr. Hamilton's Pills

There are despairing men and women by the thousands in this city whose stomachs keep them in a constant misery that can be quickly restored to vigorous health by Dr. Hamilton's Pills.

We know of no other medicine that possesses such power to kindle into new life the exhausted energies of chronic stomach sufferers.

There is an extraordinary power in Dr. Hamilton's Pills that searches out the weak spots, that braces up the delicate glands and complex workings of the stomach and bowels.

These results follow to all those who take Dr. Hamilton's Pills for Stomach Weakness, Gas, Sourness, Headache, Biliousness or Constipation.

Seekers of the better health can not do better than invest in this health-bringing family medicine.

Plan to Keep up Milk Flow

Dairy Farmers Should Take Means to Supplement Pasture.

Once upon a time when the dairy farmer expects the greatest yield from his cows and his pastures, if the season is right the land will be fairly "drowning" with milk and butter.

Unfortunately, however, the season is not always just as right as might be. Invariably in one section or another there is a drought with its consequent shortage of pasture and decrease in milk flow.

It is important at this time that some form of supplementary feed be supplied for the milk flow, once allowed to decline it is almost impossible to get it up to the previous high mark again. A little extra feed at this time will produce more milk than will three times the amount fed after the decline has taken place.

Many will have profited by past experiences and have made preparation for the shortage of pasture by sowing a piece of annual pasture or soiling crop. Others again may have some of the previous year's crop of alfalfa to fall back on.

In any, and particularly the last of the above methods, we have a very efficient means of supplementing the pastures. For those who have not yet made any provision it is not too late to sow an acre or more of some fall turnips, or even a piece of rape. The turnips may be pulled and used as feed, and all, while the rape is pastured off in the late summer and fall. Where previous preparation has not been made, cuttings of the regular crops, such as green and peas, second-cut alfalfa, and clover, will have to be made to fill the bill.

To speak of grain feeding on pasture at present prices seems absurd, and it will be found to be somewhat of an extravagance except with very high producing cows. Where the grain is obtainable a mixture of two parts bran and one each of ground oats and cottonseed meal is excellent.

Apart from the feeding of the cows, there is the question of water and shade supply. Both are very necessary. Where sufficient protection from the flies in the form of shade or underbrush is not to be had, it would be advisable to keep the animals in the stable during the hotter part of the day, allowing them out in the evening. Where supplementary feed has to be cut and hand fed to the cows less waste will be occasioned when fed while inside.

Where the cows have of necessity to be out all day they should have protection from the flies by spraying with some good fly repellent.

Survey Drought Area

Hon. C. M. Hamilton, Saskatchewan new minister of agriculture, following last week's dry farming conference at Swift Current, announces that a government commission will be appointed to make a survey of the drought areas with a view to recommending improved methods of farming suitable to the southwestern part of the province.

Hopelessly Grounded Is my son getting well grounded in the classics?" asked the millionaire. "I would put it even stronger than that," replied the private tutor. "I may say that he is actually stranded on them."

Why She Quit Charwoman—Sorry to inform you mum, as I shan't be able to come to-morrow.

Lady—And why not, Mrs. Bouser? Charwoman—Can't afford it mum. Mr. Usban says if I earn any more money 'll have to pay income tax—London Punch.

The less a man knows about a woman the more he thinks he knows.

War Criminals

Germany Does Not Give Much Indication of Keeping Faith With Allies

The second subject taken up at the Spa conference does not require much time. Germany herself suggested the League of Nations as the tribunal for the trial of war criminals. This was a striking departure from the original idea that the perpetrators of outrages should be handed over to courts in Allied countries. France took less interest in the punishment of war criminals than she did in the matter of disarmament and reparations, but the British Premier made a strong point of it in the Paris conference and in his speeches in England.

The League plan seemed to many an abandonment of the whole case, but it would at least show whether Germany of today approved the war methods of the Empire, and the former rulers and officers. In accordance with the program Britain and France forward a list of accused persons including some officers in high command in the army and navy, certain subordinate officers, officials who had control in occupied districts in France and Belgium, and commanders of German prisons. Particulars seem to have been furnished in at least forty cases.

The German minister of justice states that none of the accused have been arrested. He gives various reasons, none of which seem to be good, except that some of the alleged criminals are dead. This, however, it is true, that some have left the country, and no doubt others will follow if they are wanted that the case is likely to be prosecuted seriously. Mr. Lloyd George with characteristic bluntness, remarked that "the Germans were breaking their word" in regard to this League plan proposed by themselves.

The plausible and adroit foreign minister replies with strong assurance which the Allies pretend to accept.

We do not suppose that anybody expects these prosecutions to come to much, but the manner in which they are conducted or abandoned will be an excellent test of the present-day faith of Germany—Vancouver Province.

No Alimony—Just a Separation

Peaceful, quiet separation, no damage done, everybody happy again—that's the situation when you divorce your corns with Putnam's Corn Extractor. Acts like magic—don't use any but "Putnam's"—it's the best, 25c at all dealers.

What Portage in Prairie Has Done Portage la Prairie has already supplied members to Saskatchewan and British Columbia, and now it has given the Dominion a premier. In addition to Joseph Martin, Walter Scott and Arthur Meighen, it has given to public life Dr. J. G. Rutherford, R. B. Hudson, Hon. Edward Brown, Malcolm Watson, and other political notabilities. Winnipeg Free Press.

British Columbia Fruit Crop Prospects Generally Are Reported To Be Very Good.

Pears will be a heavy crop in British Columbia this year, according to advices from the principal fruit growing centres. Plums and prunes will be an average crop and so will peaches, cherries and apricots.

Reports from the principal stone fruit growing centres all suggest a very heavy setting of fruit, if the June crop hope is moderate, a big crop of stone fruit is assured. Although the apple yield is lighter than last year, it is expected that the young trees coming into bearing will increase the total tonnage beyond last year's output.

Push Ontario Highways Within the next three months over \$300 will be employed on the Ontario provincial highways system. The work being done at present is largely of a preparatory character and after the harvest, when farmers will not be so busy, the work will be pushed.

The Value of Trees

One Square Yard of Leaf Surface Purifies Great Amount of Air

It has been calculated that a single tree is able through its leaves to purify the air from the carbonic acid arising from the respiration of a considerable number of men, perhaps a dozen, or even more. The volume of carbonic acid exhaled by a human being in the course of twenty-four hours is put at about 100 gallons, but scientists estimate that a single square yard of leaf surface, counting both the upper and the under-sides of the leaves, can, under favorable circumstances, decompose at least a gallon of carbonic acid in a day. One hundred square yards of leaf surface then would suffice to keep the air pure for one man, but the leaves of a tree of moderate size present a surface of many hundred square yards. All other forms of vegetable life act similarly in abstracting the noxious carbonic acid from the atmosphere.

New Bankruptcy Act. The Bankruptcy Act, passed at the first session of 1919, came into force on the 1st of July, under the provision of a proclamation issued in January last. Some amendments, which consideration of the Act during the last year showed to be necessary, were made at the session just prorogued. The rules, which contain very important provisions respecting the carrying out of the Act, have recently been passed by the Governor-General-in-Council.

An Ideal Attained "Were any of your boyish ambitions ever realized?" asked the sentimentalist. "Yes," said the practical person. "When my mother-used to 'cut my hair I often wished I might be bald-headed.'"—New Haven Register.

Clerks Accept Award Clerks in the employ of the Grand Trunk railway have accepted the eight per cent. increase in wages recently recommended by a board of arbitration.

To Make Mexico Dry

Preparing Prohibitory Legislation for Presentation.

Legislation making all Mexico "dry" is being prepared for presentation to the next congress at the office of Provisional President, Dr. La Huerta, says the newspaper Excelsior. "The provisional president has decided," says a means of accomplishing the regeneration of the Indian and half-breed races, who are great consumers of alcohol.

His Essay A small boy was told to write an essay on sects of various religions; but he knew little about the subject so his essay was rather short, and this is what he handed in to the master: "There are three sects, the male sex, the female sex, and insects."

America had no wheat prior to 1530 when the Spaniards introduced the grain in this hemisphere.

Making Good Progress With Cattle Dipping

Hopes to Eliminate Mange In Affected Areas Shortly.

The first stage of the compulsory dipping order for cattle in range-affected areas in southern Alberta and southwestern Saskatchewan has been completed, according to word received by Dr. George Hilton, chief veterinary inspector for the Dominion, who is supervising the move by which the federal department of agriculture hopes to practically eliminate mange within the next six or eight weeks.

All cattle in the area designated were ordered to be dipped and work started on June 24, the total number of vats used being 88. Within a few days 12 more had been added. Dr. Hargrave, of Medicine Hat, who is assisting with the work, reports that practically every stock owner had given the department their fullest co-operation. Weather conditions were perfect. Range-riders engaged by the department covered the territory to see that stragglers were brought in behind the general round-ups.

To Garner Western Crop

The Harvest Will Require Thirty Thousand Extra Farm Hands.

Thirty thousand extra farm hands will be needed in Manitoba, Saskatchewan and Alberta to harvest the 1920 crop, it was estimated by government officials and railway heads, attending the annual harvest help conference at Winnipeg.

As usual eastern Canada is expected to supply the larger proportion of the harvest. Low fares and high wages are the attraction. From eastern points the fare will be \$18 and from Winnipeg at the rate of one-half cent a mile. Wages, it is expected, will be from \$4 to \$6 a day, but may go higher if the demand exceeds the supply.

Chile is to electrify all the 2,300 miles of railroads operated by the state.

Leveling Down Process

Carl Ackerman, a reliable press correspondent, cables from England that many factories are closing down there because of the continued demand of the workers for higher wages, and the reduced purchasing power of the public. And of course the more unemployment there is the less will be the purchasing power. The leveling-down process has started and must continue.

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or falling. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful Danderine. It is the only hair restorer that counteracts the scalp; checks dandruff and falling hair. Your hair needs this stimulant tonic, then its life, color, brightness and abundance will return—Hurry!

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or falling. Bring back its color, vigor and vitality.

Getting More Wheat

A Larger Average Yield of Wheat and Lower Average Cost Per Bushel.

Improved fertility of soil, better cultivation methods and timely and successful fighting of pests, with sufficient labor at harvest time, appear to be necessary factors of a larger average yield of wheat and lower average cost per bushel produced. Climatic conditions of course, must be reckoned with and do not affect all wheat fields alike, because of difference in soil and location. The road to a greater profit for the wheat grower does not lie solely in the direction of a higher price per bushel, but also in the various things necessary to increase the average production per acre. That is a something which is up to the producers themselves.—St. Louis Globe (Democrat).

Use Curious Stone as Barometer

There is in the northern part of Finland a curious stone which serves the people instead of a barometer. This stone, which the Finns call Ilmakivi, turns black or a blackish gray when bad weather is approaching. Fine weather has the effect of turning it almost white. The Finns regard the stone with superstitious reverence, but the scientists say that its changes in color are due to salts contained in its composition.

Red Cross Commissioner

W. F. Kerr Resigns Editorship of the Regina Leader to Engage in New Work.

Mr. William F. Kerr has resigned as editor of the Regina Morning Leader, a position he has filled for over eighteen years, to accept the post of Red Cross Commissioner for Saskatchewan, to which important office he was appointed at a meeting of the Saskatchewan Red Cross Executive on July 13, presided over by His Honor, Sir Richard Lake, Lieutenant-Governor.

Mr. Kerr is thus made the chief executive officer of the Saskatchewan division of the Red Cross Society and upon him is placed full

responsibility for carrying out and administering the peace-time program of that organization in the Province.

The covenant of the League of Nations places upon all governments that are signatories to that covenant the duty of establishing, on a sure foundation, the noble work of the Red Cross. Formerly active only in time of war, it is now to continue its work in time of peace, and in the words of the League of Nations' covenant, "to encourage and promote the establishment and co-operation of duly authorized voluntary national Red Cross organizations, having as purposes the improvement of health, the prevention of disease and the mitigation of suffering throughout the world."

To Mr. Kerr is entrusted the task of carrying out this program so far as the Province of Saskatchewan is concerned.

Moslem Fellow Citizens

Are Only Effective Friends Turkey Has In Asia.

The Turkish state is disorganized, bankrupt, beset with enemies from within like Mustafa Kemal, with potential enemies from without. She will need the active support and encouragement from her friends, in Europe and in Asia, for a generation at least. The only real friend Turkey has in Europe is England. Some of those countries which have been posing as the particular friends of the Sultan have been governed by self-interest and the desire for exploitation. The only effective friends Turkey has in Asia are the Moslems of India. Working together, England and India can stand staunchly by Turkey and help her over the dangerous road which she must traverse to restored health and strength.

If the Moslems of India antagonize England, they rob Turkey of her only friend in Europe. If they set India in a turmoil and themselves go into voluntary outlawry, they will destroy their own power of helping Turkey.

The Oil of the People—Many oils have come to be well known as "Electric Oil" continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use it for other purposes.

Tractor Which Walks

New Type Has a Series of Legs and Walks Like a Horse.

A new type of tractor that has recently been developed has a series of four cranks, each having a set of four legs, giving the tractor sixteen legs on which it walks. In addition there are four wheels automatically operated by the tractor engine, so that they can be lowered to the roadbed, thus converting the machine into a motor truck. The feet are so constructed to conform to the ground conditions.

It is said that the tractor may be used to plough, seed, cultivate, harrow, mow and harvest, rack, furnish power for other machinery as a tractor and power plant and also to act as a truck for road work and heavy hauling.

Countless have been the cures worked by Holloway's Corn Cure. It has a power of its own not found in other preparations.

A Fine Record

17,640 War Veterans Are Working For the C.P.R.

Every C.P.R. employee enlisting for war service was told that "his job would be waiting for him when he came back." Up to June authenticated statistics show that 17,640 C.P.R. men joined the force. Of these, 1,096 were killed in action or died of wounds or sickness while with the colors; 2,084 were incapacitated by wounds, leaving 7,338 presumably available for re-engagement in the company's services. Some of these, however, re-enlisted with the permanent forces; others chose to remain in England or former other business connections. The remaining 6,914 are again working for the company. In addition to this established army division of four brigades. All lines of the Canadian National Railways system gave up 5,000 odd men, about 50 percent of whom have been re-established.

A Thorough Pill—To clear the stomach and bowels of impurities and irritants is necessary when the system is irregular. The pills that will do this work thoroughly are Farmacia's Vegetable Pills, which are mild in action but mighty in results. They purge painlessly and effectively, by and work a permanent cure. They can be used without fear by the most delicately constituted, as there are no harmful effects preceding their gentle operation.

Pigeons are most abundant in the East Indies.

NOURISHING FOOD AND GOOD HOURS

Help You to Resist Disease—Aid These With a Tonic to Keep the Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. You weaken this power when you let your general health run down, your system get thin and your nerves unsteady.

You weaken it when you worry, when you over-work, when you do not get sufficient sleep, when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiates and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have been weak and nervous, and Dr. Williams' Pink Pills. At that age I was in a much run down condition, suffering from many of the well known symptoms of an anemic. My mother procured a supply of Dr. Williams' Pink Pills, and after taking about a half dozen boxes I was restored to normal health. Again after my marriage, and before my boy was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely broken in health. Half of the time I was under the care of two doctors, and for three months I was practically bedridden. At my mother's suggestion I started the use of Dr. Williams' Pink Pills. I had not been long on them when I felt better. I was helped by them. Day by day I could feel my strength returning and was soon enjoying good health once more. In view of my experience I think I can safely say there is nothing in the way of medicine better than Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all leading druggists or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

One Was Enough

A big powerful motor car slowed up as the occupants perceived a car of very modest proportions standing by the roadside in a rather battered condition. The owner of the car, on his knees, endeavoring to straighten out some of the parts. "Have an accident, my man?" queried the man in the big car. "No thank you," grimly returned the other, "just had one."

Saskatchewan Cow Scheme

Five carloads of livestock arrived in Regina having been purchased by the agricultural department of the provincial government in the east. The cattle consisting of grade cows and two-year-old heifers, the latter purchased for \$100 each, will be sold to farmers at cost plus expenses in handling.

China Exports Tea in Solid Lumps

Like bricks, for consumption in Tibet and Siberia. The tea leaves are pulverized, mixed with water, and moulded into hard cakes. The bricks weigh about five pounds each. The form tea can be carried overland more easily, as it occupies much less space.

The Sinn Fein Movement

Is Certainly Doomed to Failure On Account of Its Origin.

The widespread effect which the Sinn Fein propaganda has had upon certain sections of the public in the United States is attested by "The Nationalization of the Intellect" by Commissioner D. D. Irvine, of the Society for American and British Friendship.

Mr. Irvine, in a statement on the Irish question, declared the Sinn Fein "wedge" is being hammered in "by the wielders of the mallet of disunion" in an effort to cleave apart the United States and Great Britain. "Much labor, oratory, advertising and finance is being spent on this ignoble enterprise," he says. "Yet with the brain to direct, and the money to co-operate and gifts to finance the mad effort will be futile."

After likening the movement to "a frothy sea hammering with great display the granite portals of a coast," and predicting that the storm will settle down, Mr. Irvine continues: "It seems essential for the world to get drunk on something. There are mental portions that set the brain on fire, and in this intoxication of intellect, reason staggers from her throne, logic lies in the stupor of false deductions and conscience sleeps the sleep of senseless stupidity. Sinn Fein is a dangerous stimulant for the Irish temperament. A few prohibition laws for this mental drunkenness seems essential for the safety of the rest of the world."

"Sinn Fein is doomed! Nature dooms it. It is a cross-over of species born of Home Rule and lawless radicalism. Nature debars perpetuation of this type and the hybrid is barren. Sinn Fein is a kicking mule which will live the allotted span of kindred movements and then die in death its name ends. Every kick brings it nearer its end. Let it kick, keep away from its heels and hold the bridal train. In the circus of national freaks, Sinn Fein is the trick mule which for a time is holding the attention of the crowd while clever clowns use the beast for acrobatic antics for financial gain."

"Some movements attract strange followers. Freak movements always fascinate brains without breeding and breeding without brains; money without character and character without money. Sinn Fein is no exception. It lures the unthinking, it dupes the thoughtless, it fascinates the bad and deceives the good. But when the awakening comes keep the gangway clear for the rash adventurer who is looking for a spectacle to behold. We will see it of these days! Live awhile and see the fun."

This is to certify that fourteen years ago I got the cords of my left arm twisted and had about nine months that I had no use of my hand, and tried other treatments, also doctors, but with no success. I was cured by a perspiration from a friend I got MINARD'S LINIMENT and used one bottle which completely relieved me, and have been using MINARD'S LINIMENT in my family ever since and it has cured all my ailments. I used it, and would never be without it.

ISAAC E. MANN, Metapedia, P. Q.

Aug. 31st, 1908.

To Make Paper from Straw

Million Dollar Pulp Mill May Be Erected in Southern Saskatchewan.

W. R. Phillips, of Toronto, Ont., is at present making a preliminary survey of Southern Saskatchewan, with a view to the establishment of a million dollar pulp mill. Large financial interests in Toronto are behind the project.

Thousands of tons of waste straw in the province is to be the material utilized in the manufacture of the product.

As to the success of such a venture, Mr. Phillips is most optimistic. A plant already in operation in eastern Canada has proved most successful, while in the United States there are several mills in operation. Experience here shows that a ton of paper can be manufactured from two tons of straw, while two tons of coal would be necessary for power, the paper could be turned out at a considerably lower price than that now charged for the pulpwood product.

The New Pension Scale

Canada's new pension scale is the most generous in the world. Compared with the United States, the second highest, which is \$1,200 a year for permanently disabled, whether married or unmarried, the Canadian scale is: Single man, \$900; man and wife, \$1,200; man, wife and child, \$1,350; man, wife and two children, \$1,500; man, wife and three children, \$1,650; each additional child, \$120. The scale is practically double that of Great Britain and Australia.—Simcoe Reformer.

The harvest mouse builds its nest high up in the straws of standing corn.

It's a mean man who will snore in church and keep the others awake.

Benefit for Soldiers

Extend the Time In Which to Apply for Gratuity.

Provisions that will prove of great benefit to returned soldiers, their widows and dependents, are contained in two orders-in-council just passed by the government, endorsing certain important recommendations recently submitted by the parliamentary committee on re-establishment.

The first order-in-council extends the time in which a man who served overseas may apply for his gratuity. The time originally set as the limit in which he might apply was July 1, 1920, but this has been extended to March 31, 1921.

The payment of the dependents' portion of the war service gratuity to widows of deceased soldiers is authorized for the first time in the second order-in-council.

Britain Liquidates Debt

Arrangements have been made by the British government to liquidate the debt of \$100,000,000 to Argentina. It is proposed to make this payment by meeting periodically the interest on Argentina's external debt held in London. The July 1 payment has been made and Great Britain has already liquidated half of her debt, which was for payment for cereals. It is proposed to make this payment to \$50,000,000 which Argentina owed United States bankers.

\$100 Reward, \$100

Catarra is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. HALL'S CATARRH MEDICINE destroys the foundation of the disease, cures the patient, strengthens by improving the general health and acts as a tonic worth \$100.00 for any case of Catarra that HALL'S CATARRH MEDICINE fails to cure.

The Liquor Referendum

Voters on Plebiscite Will Be Asked to Give Definite Answer "Yes" or "No"

The Canada Temperance act, commonly known as the Scott act, will be voted upon on October 25, in the Yukon Territory and the provinces of Alberta, Ontario and Nova Scotia, and possibly one or two other provinces. The vote will be on the question whether the province-wide Scott act shall be adopted and thus prohibit the importation or conveying of liquor from other countries or other provinces into the provinces adopting the act. It will be a definite yes or no and one question only. Alexander Smith, barrister and election authority at Ottawa points out that "the last vote will be the last to be prepared under the new Dominion Election and Franchise act, as this act has repealed the War-Time Election act and other federal election laws of unhappy memory."

Hair From China

Four Hundred Thousand Pounds of Human Hair Imported From Hong Kong

Women who wear false hair do not realize how likely it is that their "added hair" tresses are derived from the heads, usually unclean of Chinese people.

Last year we imported more than four hundred thousand pounds of human hair from Hong Kong. It is cheap stuff in China, being valued at only thirty cents a pound wholesale. This is reckoned a high price, increased demand by the United States having caused an advance in the market. We paid last year \$228,395 for Chinese human hair from Hong Kong.

At that rate its original cost was a bit more than \$2 per pound; but we get the choice stuff, the longer and finer grades. Europe buys the shorter and coarser hair, largely for industrial purposes.

Special grades, extra fine, are added into hair nets, which most American women wear in these days. The automobile has made small hats fashionable, and on this account the hair is worn compact; also in order that it may not blow about when the motor car is speeding.

It is forbidden to show that the human hair imported from China undergoes very elaborate cleaning processes before it is offered for sale in this country. Still, on the whole one might wish that it came from somewhere else. Kansas City Star.

SAD DROWNING

George Thompson, of Calgary, a young lad of twelve years, was drowned at Gull Lake on Saturday afternoon last. Together with a young brother, the dead boy went out in a boat only a short distance from shore, and when a gust of wind took his hat off he jumped out to get it, thinking the water was shallow. The boat was in about eight feet of water at the time and the little fellow sank to the bottom, and before help reached him he was beyond aid. Medical men were soon on the spot, and after the body had been recovered strenuous efforts to resuscitate were made without avail. The dead boy was a visitor at the Judge Stuart home, and the death has cast a gloom over the holiday makers. The body was taken to Calgary for interment.

STEPHEN CUNDELL KILLED

Stephen Cundell, of Clive, one of our most highly respected farmers, was killed at a picnic at Haynes a day or two ago, while acting as judge at the horse racing events. One of the animals bolted and struck him, knocking him down and fracturing his skull. He only survived the accident a few minutes. His body was taken back to his old home in the States for burial. The sympathy of the entire district is extended to the bereaved family.

THE CHAUTAUQUA

Everything is now ready for the great Chautauqua, which opens here on Wednesday next, 28th, and continues for three days. There will be two entertainments a day, afternoon and evening, in the Comet theatre, and best aggregation of entertainers ever got together. Tickets for the entire series of entertainments can be purchased for \$2, and children can procure tickets for \$1.00. The Chautauqua is the best thing that ever comes to Lacombe, and is sure to draw good patronage. Tickets may be obtained at "Falls" Drug Store and also at the McDermid Drug Co.

NEW BREEDING STABLES

W. R. Cole has purchased the Planning Mill building and property on Barnst Avenue, and is busy converting same into a large breeding stable. He has procured some of the best stallions and mares in the province, including Percherons, Clydes and Standardbred, and as time goes on will add to the line. He also has several pure

bred mares. He is going to make a specialty of good horses, and horsemen in the district are invited to call around and look over his premises.

Why "His Official Finances?"

Enter something interestingly new in motion pictures! It is none other than a mystery comedy that keeps the audience as mystified as it does the leading character until a few seconds before the final fadeout. The picture is "His Official Finances," starring the Paramount-Artcraft favorite Vivian Martin at the Rex Theatre Friday and Saturday of this week. The leading character is a typist who becomes engaged to her cold-blooded employer. "For business reasons only," then falls in love with him.

WILL RAISE PRICE

On August 15 the subscription price of the Western Globe will be raised to \$2, the increasing cost of producing it compelling us to make this advance. Subscriptions at the old rate will be received up to above date.

BASEBALL

Lacombe baseballists played in hard luck this week, being defeated by Innisfail in a well contested game, and rain spoiling their chances for a win against Red Deer on Monday night. It is a long lane with no turning, however, and our boys have not given up hope.

Pauline Frederick the renowned Paramount-Artcraft Star will play at Lacombe at the Rex Theatre for one night only, Thursday 22nd in "The Fear Woman." Pauline Frederick is at her best in this remarkable production so you will do well to witness it.

Frank McKellar, of Whiteford, was a visitor at the Halpin cottage at Gull Lake this week.

The Children's Regatta at Gull Lake will be held this year on Saturday, July 24th beginning at 11 a.m. A good program of rowing races, canoe races, crab race, swimming races and diving contest, is scheduled. Children 14 years and under may compete. Children 15 years and over will be included in the senior regatta to be held in August.

F. L. Lihner's

HELPLESS WITH RHEUMATISM

Until He Took "Fruit-a-Lives" The Fruit Medicine

H. R. No. 1. Loma, Ont.
"For over three years, I was confined to bed with Rheumatism. I treated with doctors, and tried nearly everything without benefit. Finally, I tried 'Fruit-a-Lives'. Before I had used half a box I saw improvement; the pain was easier and the swelling started to go down. I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light house about the place."
ALEXANDER MUNRO.
Box a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-Lives Limited, Ottawa.

SPRUCVILLE

The basket ball team are playing with Lakehead on the 20th in the evening at Lakehead.

The regular U. F. A. and U. F. W. A. meeting will be held at the home of O. S. Young on Tuesday evening, July 27th. We are trying to arrange for a speaker for the evening. Everybody come.

There has been a number of rate-payers doing some needed road work lately. It will not be long until all the roads are opened up.

J. M. Southward had the misfortune of running a nail into his foot but he is doing fine.

James Bodin is taking in the big circuit of the fair with his fine herd of Ayrshire cattle, and by the reports he is winning his share of the prize. The crops are beginning to show the effects of the dry weather.

The visitors to the fair are already arriving in town. Entries are ahead of any year yet, and if the weather keeps fair we are going to make a record.

The balance of the high school annuals have arrived, and pupils are requested to procure their copies from Douglas Gilmore as soon as possible.

New Buildings

The building era has arrived for Lacombe. Within the last few weeks the following new brick buildings and additions to buildings are noted in our little city.

Mr. A. M. Campbell, who has for many years conducted a general store here, has nearly completed one-half of his new two story modern store and expects to be in the new part within a month. The other part of this building will be commenced as soon as the first is occupied.

Mr. L. Sandbrook, proprietor of The Cozy, has extended his ice cream parlor back to the alley, and has now one of the neatest and most comfortable stores of this line.

James Fraser will soon be in his new real estate office. This office adds greatly to the looks of the street and is an example of the progressiveness of this firm.

The McMurdo Drug Co. has just completed their new addition to their store and have now a fully up-to-date drug store. They have a larger dispensing room, and in all, their store is a credit to the town. One of the features of this new addition is the Music Room, where prospective buyers of phonographs or phonograph supplies can play over their favorite records without outside interruption.

P. V. Parsons our general pump man is commencing at once to build his new pump and repair shop on the site of the old bowling alley next to the telephone office. The brick is already on the ground and Frank expects to be occupying his new shop before the fall frost.

DANCE FRIDAY NIGHT

There will be a dance in the Comet Theatre on Friday night, to which all invited. Good music is assured, and there is a first class dancing floor.

See Morrison and Johnston, Ltd. for your Automobile Tires.

The Merchants Bank of Canada has opened a branch at the Calgary Stock Yards for the convenience of their farmer and rancher friends throughout the Province. This will be a great convenience to the customers of the Merchants. The proceeds of stock shipments to Calgary yards can be transferred direct from the Stockyards Branch to the sellers branch for his credit, and customers intending to buy stock can have their money transferred by their home branch to the Stockyards branch, and they can check it out there as they purchase cattle. The new office is conveniently located and a room has been provided for the use of farmers and ranchers, where they can make their headquarters while in Calgary. Daily quotations on live stock can be obtained by telegraph or telephone from the new branch.

Milton U. F. A. will meet at the home of Wm. McKenzie on Wednesday, July 28th, at the usual hour. The meeting will take the form of a lawn party. All are invited.

Some good values in dresses and stands. Morrison and Johnston, Ltd.

The next regular meeting of the Arbrodale U.F.A. will be held at the Fairview Church on Monday, July 26, and will be in the form of a picnic. Rice Shepherd of Edmonton, will address the meeting. Ladies will please bring baskets.

The Wheat Board is now paying 30c. per bushel on wheat participation certificates and the Merchant's Bank of Canada here will be pleased to handle any certificates now being held by farmers in district and will obtain for them the payment now being made. It is requested that the farmers will please give this matter their prompt attention and thus cause no further delay.

Gasoline Engine 1 H.P. price \$40.00. Apply Morrison and Johnston, Ltd.

English Church Services at 11 a.m. and 7:30 p.m. Sunday School at 12 noon. Holy Communion at Blackfalds 3 p.m.

DIED

Shaw—Died on 10th inst., at the home of her daughter, Mrs. D. F. Miller, Blackfalds, Margaret Shaw, aged 73 years.

"A spin in the country! The hamper full of good things to eat, the tank full of Imperial Premier gasoline and the crank-case filled with Imperial Polarine. Nothing can mar the day's pleasure."

Thorough Lubrication

IMPERIAL Polarine can be depended on to give you thorough lubrication, to keep the engine running quietly and faultlessly, to take you a 100 miles or 1,000 miles at the least cost for fuel, oil and repairs.

Imperial Polarine forms a piston-to-cylinder seal that maintains compression and utilizes the full power of the fuel. It spreads a thin, yet unbreakable oil film over every friction surface that minimizes wear—it is the perfect lubricant.

Imperial Polarine will not break up under high operating heats. It burns freely with hardly a trace of carbon. Costs less because it saves depreciation and fuels. Sold in gallon and four-gallon sealed cans, half-barrels and barrels, also 12 1/2-gallon steel kegs, by dealers everywhere.

Look for the Imperial Polarine Chart of Recommendations when you buy oil. It shows which of the three grades described below is recommended for your car. Use the grades specified, exclusively.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)

A GRADE SPECIALLY SUITED TO YOUR MOTOR

IMPERIAL OIL LIMITED

Power • Heat • Light • Lubrication
Branches in all Cities

A healthy body means healthy arteries. The railways are the arteries of Canada.

IN the operation of railways Canadians hold high reputations.

The chief Canadian systems are operated over great stretches of territory presenting widely different problems.

Their traffic obligations fluctuate rapidly with the seasons.

Climatic conditions are sometimes difficult. Unusual foresight, skill and determination are called for.

Yet the only unailing highways for the heavy traffic across the New World from China to France during the war—were Canadian railways.

Canada alone among the allied countries had no war-time transportation crisis. When foreign roads choked under their load, she relieved them of millions of tons. At a time when ships were the need of the hour no ship lost time in any Canadian port through failure of the railways to deliver cargoes at the docks.

To-day the Canadian producer still commands the fastest, the most dependable and the cheapest railway service in the world.

But the foresight that made this record possible could do nothing without MONEY! The skill that kept terminals uncongested had to be backed with MONEY! The determination that drove crippled engines ahead in the face of 40-below gales and mounting snow would in the long run have been useless without MONEY!

Thus to-day the alarming fall in the net revenues of the railways is a menace to railway efficiency. It injures railway credit. It dissolves the reserves needful to meet the expanding needs of a growing country. It imperils national prosperity.

Increased freight rates are imperative therefore, not merely on behalf of railways but in the interests of Canada itself!

This is the first of a series of advertisements published under the authority of The Railway Association of Canada formerly the CANADIAN RAILWAY WAR BOARD

In July 1918 the Canadian railways were threatened with a general strike. To prevent this public catastrophe they agreed to follow the American scale of wage increases. The Government of Canada meantime allowed freight rates to increase intended to make up the cost of these new wage rates.

Leaving aside all question of increased cost of material, the new wages cost the railways of Canada an extra eighty million dollars for the first year alone.

The new rates yielded them an additional forty-three millions!

The annual deficit on wages alone was thirty-seven millions and is constantly growing!

Comment on Current Events

The last week of June and the first few days of July were prolific in important changes in the political life of Canada, and in some respects these were but indicative of the unsettled state of politics generally throughout this and other countries. The Union Government, which was brought into being through the efforts of Sir Robert Borden as a war administration late in 1917, having fulfilled its destiny, has passed away; Sir Robert Borden has laid down the responsibilities of the premiership, and these have been placed on the younger shoulders of Hon. Arthur Meighen, who is not only the youngest premier Canada ever had, but also the first man to achieve that high office. His Government will be representative of the new political organization which supersedes the Conservative and Unionist parties in Federal politics, and which has been named the National Liberal and Conservative Party. In addition to Sir Robert Borden, Hon. N. W. Rowell and Hon. Martin Burrell retire from the Government; consequently the first test of the strength of the new administration with the public will come with the election of the new ministers to be chosen.

A second change of moment was the resignation of Sir Lomer Gouin from the premiership of Quebec, an office he has held for the past fifteen years, and a longer period than any of his predecessors. Sir Lomer's retirement does not mark any marked change in the Quebec Government. He is leaving political life to engage in the activities of business, commerce and finance, and is succeeded in the premiership of Quebec by one of his former cabinet colleagues, Mr. Taschereau.

Even more significant of prevailing public opinion in Canada today was the result of the Manitoba Provincial elections which has created in the oldest of the prairie provinces a situation somewhat similar to that existing in Ontario. Of the four largest groups in the next legislature—Liberal, Farmer, Conservative and Labor—no one commands a clear majority in the house. Followers of the Norris Government constitute the largest single group, with the second, Farmers third, and Conservative fourth, with few Independents in addition. The Norris Government will carry on with the support of certain of the Farmer and Independent members, while Labor will probably constitute the official opposition party.

The Manitoba elections were also noteworthy by reason of the fact that for the first time in Canada the system of Proportional Representation was applied in a Parliamentary election, the city of Winnipeg electing its ten representatives by that method. All parties seem agreed that it was a marked success and gave general satisfaction. With ten members to be elected out of a list of 41 candidates cast, the new system was given the hardest test yet applied to it in any English-speaking country, and the successful outcome would seem to point to its early adoption throughout Canada.

As indicating that there has been little change in the war-time sentiment of people on the question of New Brunswick referendum is of interest. Two questions were submitted to the electorate: (1) Whether the prohibition laws should be retained, importation stopped, and a bope-dry condition created, or (2) whether the sale of wines and beer should be permitted. By a vote of three to two the people declared against the sale of wines and liquor, and by a two-to-one vote emphatically recorded their preference for absolute prohibition of the traffic in intoxicants for beverage purposes.

While the people of Canada have thus been engaged in their own political affairs, in the United States the Republican and Democratic parties have adopted their platforms for the presidential elections next November and named their candidates. A clear-cut issue on the Peace Treaty and League of Nations is now presented to the American people, and the voters will themselves decide the issue, the Republicans bitterly condemning the acts of President Wilson at the Peace conference, and the Democrats upholding the League of Nations as necessary for the future preservation of the peace of the world. While not concerned in the

essentially domestic policies of the United States, Canadians will follow with keen interest the struggle for and against acceptance by the United States of a place in the League of Nations and as a co-partner with the other civilized peoples of the world in maintaining the highest international ideals.

U.S. Wants Western Beef

Alberta Cattle are Sought After in the United States. In a recent address before the Stockmen's Protective association of Western Canada, Mr. C. A. Dunbar, of Chicago, laid special emphasis on the fact of the esteem in which Western Canadian cattle were held in the United States. He pointed out that for the purpose of immediate slaughter, grass-fed cattle do not command as high a price as grain fed, neither do animals that have been shipped long distances sell as well as those originating from points closer in. For these reasons grass-fed cattle Alberta can hope to pay in Chicago, he stated, on a par with grain fed animals from Iowa and Illinois. As compared, however, with American grass fed cattle shipped an equal distance, the Alberta product ranks amongst the best. It is as feeders, rather than as slaughterers, that Canadian cattle are sought after.

One Great Essential To a Woman's Health Is Her Nerves

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay no attention to their social and household duties that they do to their health. If any woman thinks that they become irritable and nervous, have hot flashes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy. Milburn's Heart and Nerve Pills are the very remedy that nervous, tired, weary women need to restore them to the blessings of good health. Mrs. E. H. Ryan, Sand Point, N.S., writes: "I have been a great sufferer from nerve troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not walk across the floor without trembling. I had hot flashes and fainting spells. When I was on my second box of Milburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in the house and recommend them to all who suffer with their nerves." Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Indian Trophies for Museum

Considered the Highest Examples of Cree Art in Existence. Chief Piapot's saddle cloth and a Cree woman's saddle cloth have been lodged with the provincial museum at Regina, by William Leach, of Moose Jaw, an old-timer in this province who brought the C.P.R. steel into Regina in 1882. These trophies are considered the highest examples of Cree art in existence, and it required two years of negotiation before Mr. Leach was able to secure possession of them. For the past couple of years they have been on display in San Francisco and will likely be exhibited at the provincial summer fair. The saddle cloth is worked in beads in leaf form and sewn with burnt sinews. The work is highly artistic, and both pieces are worth a considerable sum of money.

Minard's Liniment Relieves Distemper

Director—Charlie, we're going to take a movie of your laundry this afternoon. One Lung—You crazy man! Nobody can make movie, me gotta least—Film Fun.

SAY "DIAMOND DYES"

Don't afford to ruin your material in a poor dye. Main use "Diamond Dyes." Easy directions in package.

"FREEZONE"

Lift Off Corns! No Pain!

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, and shortly you lift it right off with fingers. Truly! Your druggist sells a little bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the callus, without soreness or irritation.

Don't Hawk, Blow, Sneeze, or Cough Use "Catarrhozone"

When germs attack the lining of the nose, make you sneeze and cough when later on they lodge the bronchial tubes—how can you follow them with a cough syrup? You can't do it—that's all. Cough syrups go to the stomach—that's why they fail. But Catarrhozone goes everywhere—gets right after the germ—kills them—breaks the soreness—cures the inflammation—makes Catarrh disappear. Not difficult for Catarrhozone to cure, because it contains the essence of pine balsams and other antiseptics that simply mean death to catarrh. Large size costs \$1.00 and contains two months' treatment; smaller sizes 25c and 50c, all druggists and storekeepers.

Pulp Mill for Port Arthur

Provincial Paper Mills Will Spend a Million and a Half on Undertaking. Port Arthur will be the scene of important developments in paper manufacture when the plans are completed of the Provincial Paper Mills, Limited, Toronto, who have just been incorporated. About \$1,500,000 is estimated to be the amount to be spent in Port Arthur, where the plant, which occupies 140 acres in the city of Port Arthur, has turned out about \$2,000,000 of sulphite, which has been sold in the United States, chiefly in Wisconsin and Minnesota. It is now intended to complete the product into paper on the site, with a mill to turn out forty tons a day. With the expenditure of \$500,000 on the mill, absorbed by the new company, these productions will be increased.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Gray's worm exterminator will protect the children from these distressing afflictions.

Growers Form Wool Pool

Michigan Farmers' Syndicate Will Market Fleeces for Best Prices. Through the Michigan Farm Bureau a goodly number of the farmers of Michigan have formed a wool pool, which amounts now to 2,500,000 pounds and will shortly become a stack of 4,000,000 pounds. By means of this pool the farmers hope to get a price for their wool in keeping with the prices of wool cloth and similar commodities. It is their opinion, by the best advice the bureau can secure, that the price will go up from about 22 cents to at least twice that amount and yield a sum in keeping with their anticipations when the shearing season came on.

The big stock of wool belongs now to some 10,000 individual farmers, and that number will increase to about 15,000 taken into the pool by the bureau from about 170 local assembling points where the wool is stored, sacked and shipped in car lots to Lansing. When a farmer turns his wool in to the bureau he can secure an advance of 75 per cent of its value at the current market price. The farmers, however, this year do not seem to be in serious need of immediate funds for very few have asked for this advance. Farmers in other states are forming similar pools although no one of them is anywhere as extensive as this one. In New York state, for instance, the growers have small pools in 37 different counties.

To Use the Red River

May Come Into Prominence as Transportation Route. Efforts are to be renewed to bring back to the Red River of Manitoba something of the importance it held in the pioneer days as the main artery of commerce of the west. Fifty years ago the Red River was the first link in the chain connecting the Manitoba settlers with the outside world. With the coming of the railways the Red lost its place in the transportation world. Today its tawny waters float only a fleet of pleasure boats and an old scow bringing sand, gravel, or wood from the northward. Soaring freight rates, however, have created interest in the Red River as an artery of commerce and the Winnipeg and St. Boniface harbor commission is planning extensive dredging and the erection of large docks at Winnipeg and St. Boniface. The discovery of gold and copper along Lake Winnipeg, the high prices now prevailing for wood and lumber, and the interest in the pulpwood fields of Northern Manitoba, are all combining to bring the Red River again into prominence as a transportation route.

To Keep Meek

During hot months hay cornmeal, Graham flour, or cereals in smaller quantities, than can in airtight glass jars, for insects seek dark places mostly to do their damage. If one is afraid it has been visited by insects, sift and place in a hot oven in shallow pans and heat about to the scorching point, then cool before using. If cornmeal does scorch, trifle it gives a pleasant parched flavor to corn bread or mush.

An Unvalued Site

(London Daily Chronicle). The news that the Bank of England is to be rebuilt draws attention to a fact which has often puzzled business men, and that is the position of the site on which the present building stands has never been valued, though it is undoubtedly the most famous in the world. What is more, the balance-sheet of the bank never includes the site and the buildings as one asset, though if there were in the possession of any other company they would probably be included as worth anything up to 10,000,000 pounds. But the bank's position is so secure that it can afford to neglect even such a great asset.

Valuable hardwood forests abound in Panama.

Enormous Debt Of the Nations

Has Exceeded Since Countries Reached High State of Civilization.

The combined national debt of the United States, Great Britain, France, Italy and Germany, according to recent estimates by the Bankers' Trust Company, of New York, approximate the vast sum of \$178,000,000,000. Germany heads the list with a debt of \$50,000,000,000. The others follow in this order: France \$40,000,000,000, Great Britain \$39,000,000,000, United States \$25,000,000,000, and Italy \$18,000,000,000. National debt is built up chiefly by warfare, yet paradoxically, as these countries have reached a higher state of civilization, their national debt has expanded enormously. A study of "English Public Finance," by the Bankers' Trust Company traces the origin of national debt. It shows that prior to 1688 the national debt, as an institution, was unknown in England and probably elsewhere.

The Oldest Living Thing

Huge Cypress Tree Said To Be 5,000 Years Old.

A huge cypress tree in a churchyard near Santa Maria del Tule, in Southern Mexico, according to scientists, is the oldest living thing in the world, being between 5,000 and 6,000 years old. This age is based on the gigantic bole of the tree and the slow growth of the species. The figures mean that when the seed from which the tree sprang fell upon the earth King Menes was holding the first reign in Egypt of which we have an historic knowledge, 3,000 years before the birth of Christ.

Humboldt discovered the tree more than 100 years ago. He nailed to the tree a wooden tablet containing his autograph and, although it is now partly hidden by the subsequent growth, the autograph is still legible.

Demand for Farm Help

Good Wages Offered and Plenty of Work for All.

With the practical assurance of a bumper crop due to recent heavy rainfalls, the demand for farm hands at Calgary and other points of Western Canada has increased considerably. The wages offered for this class of work is very good, verging \$85 a month and board.

The superintendent of the Calgary branch of the Alberta government Employment Bureau is responsible for the statement that during the week ending Saturday, July 11th, a total of 672 applications were made for work and of this number 529 were placed locally. Eight men were transferred to other provinces. One man, a mechanic, was shipped to this office from outside the province. One hundred and eighty men were placed in farm work, 20 in the building trade and 28 in hotel work. Bush work, 51 railway work, 6 were mechanics and 21 laborers. The remainder were unclassified.

The women's section is handling more applications each week. During the past week 73 applications were made and 41 women were placed in farm work, 10 hotel work and 8 domestic. At the end of the week 70 women were wanted for farm work, 60 domestic and 60 in hotel work. A total of 189 positions remained unfilled at the end of last week.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting, through their action in an unclean stomach, but they are entirely harmless. In some cases they are depended upon to clear all worms from the system.

To Keep Meek

During hot months hay cornmeal, Graham flour, or cereals in smaller quantities, than can in airtight glass jars, for insects seek dark places mostly to do their damage. If one is afraid it has been visited by insects, sift and place in a hot oven in shallow pans and heat about to the scorching point, then cool before using. If cornmeal does scorch, trifle it gives a pleasant parched flavor to corn bread or mush.

An Unvalued Site

(London Daily Chronicle). The news that the Bank of England is to be rebuilt draws attention to a fact which has often puzzled business men, and that is the position of the site on which the present building stands has never been valued, though it is undoubtedly the most famous in the world. What is more, the balance-sheet of the bank never includes the site and the buildings as one asset, though if there were in the possession of any other company they would probably be included as worth anything up to 10,000,000 pounds. But the bank's position is so secure that it can afford to neglect even such a great asset.

SUNDAY SCHOOL LESSON

LESSON FOR JULY 25 DAVID SUCCEEDS SAUL AS KING

The death of Saul lay open to David the path to the throne. This would have rejoiced the heart of many, but David was sad. Instead of reward being given to the slayer of Saul, quick vengeance was exacted upon him.

David Made King Over Judah (2:1-4). He knew full well that the Lord by the hand of Samuel had anointed him to be the successor of Saul. He had learned that lesson when which the School of Providence was designed to teach, namely, that the position now open to him was no easy one to fill. His exile and sufferings gave him self-control. He had the good sense to know that promotion to the throne did not bring "harder duties and multiplied perplexities." He threw himself upon God and asked for guidance. He rendered instant obedience to the Lord's answer. If we are to enjoy God's fellowship and blessing we must render quick obedience to His voice.

God prospered him. When he reached Hebron the men of Judah came and anointed him king over them. Thus a part of the nation recognized him as king and ratified his work which Samuel had done many years before. When David went up he took with him all who had been with him in exile and suffering. They are now sharers with him in the kingdom. When David's great son, Christ, shall enter upon his glorious reign, those who have been faithful to him in his rejection shall reign with him. "If I suffer we shall also reign with him." (1 Tim. 2:12); "To him that overcometh we will grant to sit with me in my throne, even as I also overcame, and am set down with my father in his throne." (Rev. 3:21).

II. David's Behavior Toward the Men of Jabesh-Gilead (2:4-7). The men of Jabesh were not to Saul (1 Sam. 11), and they showed this recognition of David by making a grave for him and burying his body from the ignominious exposure at Bethleham. David's act of sending men to Jabesh with a message of good will for their affectionate remembrance of Saul is an exhibition of his noble generosity. His love for the unfortunate king was so great that he forgave and forgot them all. This was an act of political shrewdness as well as a generous one. In fact the only policy which proves effective is that which proceeds from a generous heart. He deftly followed this generous commendation with a solicitude for the men of Jabesh to transfer their loyalty to himself, since he is now their legal king. Since Saul is now dead, he urges them to be valiant for him. In view of the fact that he was to follow him he knew it would require valiant men to stand by God's king. This appeal to be valiant is needed now, for we are all called upon to take sides between God's appointed king, Jesus Christ, and Satan, the pretender to the throne. May Christ's appeal result in making us faithful and valiant for him.

III. The Dual Kingdom—War Between the House of Saul and the House of David (2:8-12). This period of civil war lasted several years and a half years. Most of the tribes of Israel clung to Ishboeth, Saul's son, whom Abner had proclaimed king at Mahanaim. Fends continued between the rival generals. David's power increased while that of Ishboeth's waned, until at last Ishboeth was slain by a nurse crop should be allowed to ripen rather than to be cut green.

The best method of breaking up the sod of cultivated grasses and clover is to plow immediately after taking off the crop, pack and work a summer fallow for the balance of the season. The growing of a crop and plowing it under as a green manure has not been found to be a success, being much too costly and not giving as good results as a good summer fallow, especially when a coating of well-rotted manure was applied to the summer fallow.

Thorough preparation of the seed bed has been shown to be necessary for the best results. This is especially noticeable in dry years. The use of the packer has given good results, particularly when used immediately after plowing and to be comparatively little difference between types, however. In this connection it should be mentioned that the culti-packer has not been used in this experiment as it was not out when the experiment was planned.

In depth of summer little results can be noted. The results have varied too much from year to year for any conclusions to be drawn as yet.

Horses in Saskatchewan (Buffalo Express). Saskatchewan is generally associated in the mind with cold weather and wheat. It is surprising to learn, therefore, that it leads the Canadian provinces in horse population, there being a total of 1,096,000.

Saw Possibilities In Experiment

Liverpool Dockmaster Evolved Principle of Modern Lighthouse.

Sometimes during the latter part of the eighteenth century a scientist named John Smeaton made a wager that he would read a newspaper by the light of a "fardling disc" at a distance of 30 feet. To do this the scientist merely coated the inside of a shallow box with sloping pieces of looking glass so as to form a concave lens, put his fardling disc in the box and readily deciphered the small print at the stipulated distance. The experiment was witnessed by a Liverpool dockmaster. He was a thinking man and saw great possibilities in this learned test. He immediately adapted the principle to the lighthouse requirements and, forthwith the modern reflected light with its mile of range and greatly multiplied life-saving powers sprang into being.

Soil Cultivation

Results of System of Cultural Experiments Carried on at Experimental Farm.

A comprehensive system of cultural experiments has been carried on at the experimental farm in the west for a number of years and the results obtained indicate the best practices for the districts which are similar as regards rainfall, soil conditions, etc., to the farm on which the experiments were conducted. The results on which this article is based were obtained on the experimental farm at Indian Head, Sask., and the conclusions arrived at are applicable to districts similar to it. The best depth of plowing summer fallow has been found to be from six to eight inches, with comparatively little grain in yield in the wheat crop from any deeper plowing. Subsoiling did not increase the yield of wheat but in the following crop of oats the subsoiling increased the yield from six to ten bushels per acre. It should be noted, however, that the subsoil was not stirred up and that the wheat stubble was plowed five inches and not subsoiled.

The plowing of summer fallow should be done early. In June as there is a decrease in yield and an increase in cost it is left until later. Two plowings of summer fallow are not necessary and should not be practiced unless for some special purpose, such as the killing of perennial weeds like couch grass which may have infested the land. The growth of pasture crops such as rape, on the summer fallow, particularly where the rows were close together, caused a considerable decrease in the wheat crop and also in the crop of oats which followed. Fall plowing previous to summer fallowing which gives sufficient increased returns to pay for the labor, but fall cultivation did.

The main points brought out by this experiment have been that on the average fall plowing that is packed gives the best returns in growing wheat while with oats the ground should be cultivated in the fall and plowed in the spring. Best results in securing a catch of hay have been obtained by seeding down without a nurse crop in every case and also where seeding was done either on summer fallow or following a crop of corn. It should be noted, however, that the increase in hay was not enough to compensate for the loss of a crop of grain where the seeding down followed summer fallow or corn. In districts of fair rainfall, therefore, a nurse crop should be allowed to ripen rather than to be cut green.

The best method of breaking up the sod of cultivated grasses and clover is to plow immediately after taking off the crop, pack and work a summer fallow for the balance of the season. The growing of a crop and plowing it under as a green manure has not been found to be a success, being much too costly and not giving as good results as a good summer fallow, especially when a coating of well-rotted manure was applied to the summer fallow.

Thorough preparation of the seed bed has been shown to be necessary for the best results. This is especially noticeable in dry years. The use of the packer has given good results, particularly when used immediately after plowing and to be comparatively little difference between types, however. In this connection it should be mentioned that the culti-packer has not been used in this experiment as it was not out when the experiment was planned.

In depth of summer little results can be noted. The results have varied too much from year to year for any conclusions to be drawn as yet.

Overcrowding the Earth

Estimated That In 177 Years From Now, Maximum Population Will Be Reached.

According to the statistics, the population of the world cannot go on indefinitely at the present rate. It has been estimated that if it does, then we are near the end of our tether. In about 177 years from now the maximum population that the earth can support will be reached. This only of course, if the present rate that is reasonably living within its assets of land in France, for to double her population requires 433 years. If the present rate of increase of the population of the world is maintained (supposing such a thing possible), then in 2,000 years the population would be twenty-five times greater than it is now.

Minard's Liniment Relieves Colds, etc.

To Further Lignite Project

Additional Grant of \$200,000 Made to Saskatchewan Bricketing Plant.

To meet the increased cost of construction of the lignite bricketing plant an additional appropriation of \$200,000 has been made. This makes the total vote for the plant \$600,000. Of the additional vote, \$100,000 is provided by the federal government, the governments of Saskatchewan and Manitoba dividing the other \$100,000 between them. This is the same ratio as the original vote. The lignite utilization board has found it impossible to complete the project on the original grant of \$400,000. A recent estimate shows the total cost will be about \$600,000, exclusive of housing. In order to compare these figures with the original estimate of \$400,000, the board made a careful enquiry into the price of the present contemplated plant had it been erected in 1917, the date at which the original research council report was prepared. The result was a total estimate of \$390,000, which shows that the present designs are no more elaborate than were contemplated originally.

The Hon. Arthur Meighen agreed that the federal government would contribute another \$100,000 on condition that Manitoba and Saskatchewan would each contribute a further \$50,000. The question has been taken up by Mr. Meighen with the two provincial governments and so far as Saskatchewan is concerned, the additional appropriation will be met.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the troubles due to the bowels being out of order, should be put on the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which always depends upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them Mrs. Thomas A. Boutot, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great service when my baby was suffering from constipation." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Roumanian Wants Canadian Trade

Roumanian firms of paper users are turning to the United States and Canada for their supplies, according to announcements in this week's bulletin of the department of trade and commerce. Other Canadian products being sought by Roumanian firms include: Leather and leather goods, including boots and shoes, textiles, furs, fresh and canned foodstuffs, drugs and chemicals and iron.

To Asthma Sufferers.

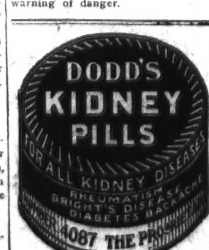

Dr. J. D. Kellogg's Asthma Remedy comes with a helping hand to a sinking swimmer. It gives new life and hope by curing his trouble—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tested remedy and find like thousands of others.

Auto-Buses for Jerusalem.

The Ramallah Company, of Jerusalem and New York, recently shipped several motor trucks fitted with special omnibus bodies to accommodate twenty-five passengers, the first of their kind ever sent to Palestine. So the Holy City will soon begin to look like a western town. The day of the camel is passing.

Crows when at rest in the treetops

or when foraging in the fields invariably have sentinels out to give warning of danger.

Germans Decide To Accept the Coal Agreement

Spa, Belgium.—The German representatives have signed the coal protocol drawn up by the allied representatives, thereby settling one of the most difficult questions which has come up in the present discussion.

After a four-hour discussion the signatures were appended to the document at the Villa Franciscus. There was a conflict over the interpretation of the protocol of the mine area of occupation of additional territory by the allies, should Germany not sign the agreement. The Germans objected to the preamble which declared that the decisions set forth in the document had been taken in common accord by the allies and German delegations.

The Germans contended it was not common accord but by sole will of the allies. Dr. Feherbach sent for three of his cabinet colleagues who were at the German headquarters and called a cabinet meeting. An hour elapsed before Chancellor Feherbach and Foreign Minister Simons appeared at the conference room. After an explanation by Dr. Simons, all the delegates signed the protocol.

Before the arrival of the German delegates, allied plenipotentiaries considered the list of reparations due from Germany. The reparations will be made on the following basis: France, 52 per cent; Great Britain, 22 per cent; Italy, 10 per cent; Belgium, 8 per cent; and Japan and Portugal each three-fourths of one per cent. The remaining six per cent will be divided between Serbia and Poland.

Belgium will retain the priority right to 2,500,000,000 marks, from which will be paid sums loaned Belgium by the allies.

Want Salary Boost

Postmasters to Work for Short Hours and More Pay.

Winnipeg.—Shorter hours, increased salaries and time and a half pay for overtime, were resolved upon as the coming year's objectives by the Canadian Postmasters' Association at the concluding session of their convention here. Other resolutions adopted include a request for participation in the civil service bonuses, and a demand that special consideration be given the pay basis of postal officials at customs ports and to officials on night staffs transferring mails from trains.

Affiliation of the association with the railway postal clerks, city postal clerks and letter carriers' associations was recommended. All of the officers were re-elected.

The Fighting Irish

Sinn Fein and Unionists Stage Battle Near Belfast.

Belfast.—About 2,000 Sinn Fein and Unionists had a fight in Lurgan over the capture of a man who is alleged to have participated in a recent raid on a mansion near Lurgan. Many persons were wounded in the fighting. A party of troops from Belfast arrived in the town and removed the man from Lurgan. The trouble had its origin in a demand by the Sinn Fein for the release of the man which the Unionists opposed.

By-Elections Coming.

Ottawa.—There is still no announcement as to when the necessary two by-elections in the maritime provinces will be held, but the forms necessary under the new franchise act are being got into shape for whenever the contests do take place. It is expected to take some time yet before everything is in readiness for taking the vote in any of the ridings open.

Alberta Coal for East.

Windsor, Ont.—Acting on the advice of the fuel controller, the city council yesterday placed orders with mine operators in Alberta for large supplies of coal to be shipped immediately. Information gathered here shows that this coal can now be transported here as cheaply as coal from the United States.

Ex-Empress' Estate

London.—The estate of the late Empress Eugenie is valued at considerably more than £2,000,000, according to the Daily Mail. Some of the jewels of curious design are valued at almost priceless.

Will Great Overseas Editors.

London.—The agenda for the empire press conference at Ottawa, August 5, 6 and 7, provides for addresses on the first day by the governor-general and premier and discussion on the empire press and the execution of an empire parcel post system.

Opium in Egg Case

Mounted Police Discover Avenue By Which Drug Was Being Shipped to West.

Ottawa.—The accidental discovery at Papineauville, Que., a few days ago, by the Canadian express authorities of a quantity of opium which was consigned to Calgary, has furnished the Canadian mounted police with the avenue by which they believe quantities of this drug have been shipped to the west during the past few months. For some time past a Chinese restaurant keeper at Papineauville has been in the habit of consigning one, two or three cases of eggs at a time to a fellow celestial at Calgary. There had been no suspicion attached to the shipments until one day last week when one of the cases of eggs forming part of a shipment, was found to be leaking. The express company officials reported the broken case and when examined the case was found to contain opium.

In the meantime, the consignor apparently got wind that the jig was up for he has disappeared. The investigation is going on and the consignor is also being sought.

Relic of the Lusitania

A Silent Remembrance of Work of the Huns.

Philadelphia.—A lifejacket, a silent remembrance of the Lusitania five years ago, and bearing a strand of faded blonde hair, was picked up yesterday in the Delaware river. The name of the ship torpedoed still remained clear and distinct on the wave-beaten canvas, which has been adrift on the seas throughout three years of war and two years of peace.

The lifejacket, which was found by two railroad detectives, was covered with slime and seaweed with one arm strap broken.

When Greeks Meet Turks

London.—Details of the Greek victory over Turkish Nationalists at Balkessia, Asia Minor, received by the Post, included the statement that the Greeks had executed 1,000 Turkish prisoners on the ground that they were bandits and therefore liable to execution under international law. Several hundred more were held for trial on similar charges.

News of the Provinces

MANITOBA

Winnipeg Man.—Col. W. G. Barker, V.C., the famous Canadian ace, was in the city recently arranging for the disposal of twelve aeroplanes for the United States and Canada. The Bishop-Barker Company is commencing a week-end service from Toronto to Muskoka Lakes, and he predicted an aerial service between the Queen City and Winnipeg within the next five years.

Winnipeg Man.—Flax fibre, grown and manufactured in Manitoba by the Netherlands Canadian Flax Co., brought one thousand eight hundred dollars per ton on the open market in Belgium. This was manufactured in the Neuseau plant, and brought ninety cents per pound.

Brandon Man.—J. M. Lohr, a Minnesota farmer, has purchased 7,200 acres of land near Guntton, and is breaking with a view to seeding with flax next year. In addition, he has rented five sections near Sperling, Man., which are seeded to flax this year.

SASKATCHEWAN

Regina, Sask.—Latest report of crop conditions in Saskatchewan issued by the Provincial Department of Agriculture, is said to be the most favorable report ever issued by the Province. It comprises reports from 57 points, representing the whole province, every reporting point testifying to the healthy state of the crop.

Saskatoon, Sask.—Milk producers patronizing provincial creameries now monthly gross, are getting 700 twelve months ago. These figures only include shippers to the Government.

Moose Jaw, Sask.—Although in operation only four months, the Southern Saskatchewan Stockyards have proved a successful undertaking. During this period, a total of 486 cars have been handled, comprising 29,000 head of livestock. The yards at the present time are capable of accommodating 3,000 head of cattle and extensions of considerable dimensions are already planned.

ALBERTA

Calgary, Alta.—Further prospects for oil development in Western Canada are announced by the western superintendent of the Imperial Oil Company. In addition to the several wells the company are sinking in various parts of Alberta, a new prospect has been opened at Consp, Sask. The well, near Garfield, Alta., is down about 1,400 feet, progress is being made west of Nanton. In the far north, drilling is proceeding on Great Slave Lake and the McKenzie River.

MAY PROHIBIT COAL EXPORT FROM CANADA

STATES WILL BE EXCEPTED

Conservation of Fuel Supply in View of the Almost Certain Shortage Next Winter.

Ottawa.—It is understood that as the first step towards conservation of the fuel supply, in view of an almost certain shortage next winter, the railway board will, in the near future, issue an order prohibiting the export of Canadian coal, excepting to the United States and Newfoundland.

It is also understood that the order will prohibit the bunkering of ocean going vessels at Montreal with American coal. This practice, it is stated, has resulted in the serious depletion of stocks of American coal brought to Canada. After the issuance of the order, it will be necessary for vessels to bunker with coal which is the product of Canadian mines.

At a conference of the members of the railway board, the coal situation was given preliminary consideration and it is anticipated that measures other than these will be evoked to conserve the fuel supply. Seen after the conference, Chairman Carvell said he had nothing further to announce at present.

Find Amber Deposits

Prospector Reports a Rich Discovery in Manitoba.

The Pas, Man.—With a gunny sack full of pure amber, Jack Murray, former editor of the Canadian Mining Journal, has returned from Cedar Lake, 80 miles southwest of here, where he reports a plentiful supply of amber is scattered about the sand and the muck on the borders of the lake. He states that a canoe could be filled with it in less than an hour. The presence of amber at that place has been known for several years and until Murray examined it for New York and Toronto interests its value was unknown.

Col. J. B. Miller, of the Parry Sound Lumber Company, and Major Craig, of Toronto, have left here for the amber fields.

Wheat Stores Must Be Reported

Canadian Wheat Board Demands Return From All Licensees.

Winnipeg.—A new regulation, No. 143, of the Canadian wheat board, orders that all licensees of the board other than milling licensees must file with the board sworn statements of their stocks of wheat by midnight July 31.

The regulation also provides that licensees must make delivery to the board of all wheat purchased by them as licensees of the board on or before August 15, in store at public terminal elevators located at Fort William or Port Arthur, and on production of the proper documents of title, the board will pay, or cause to be paid, the cash payment fixed by other regulations of the board.

Allies Must Be United

Miller and Says That Accord Is the Thing That Will Count.

Spa, Belgium.—Premier Miller, in an interview with correspondents, declared that the financial conference will be held July 23, as scheduled. Speaking with deliberation, he said that the allied governments must be united in their support of the German attitude. He went on: "If the allies are in accord, Germany will do what we want. If they are not in accord we cannot make Germany respect the treaty. My impression is that the Germans have a pretty good idea that we have a definite plan, and hope to follow it."

Less Acreage Sown to Wheat

Dominion Bureau of Agriculture Estimates Decrease of Ten Per Cent.

Ottawa.—The acreage sown to wheat, including fall wheat in all Canada, is now estimated at 17,658,000 acres, which compares with 19,295,286 acres the final estimate for 1919 and represents a decrease of 10 per cent.

Spring wheat, according to the estimate of the Dominion Bureau of Agriculture, is 11 per cent. below that of last year; acreage in oats has increased 4 per cent. from 14,953,154 to 15,555,000 acres; barley is sown on 2,880,000 acres or 2 per cent. less than last year; rye, 727,900 acres, or 3 per cent. less.

The acreage in potatoes is 819,000 acres, practically the same as last year. The three prairie provinces have an estimated acreage sown to wheat of 15,717,000 acres against 17,750,167 last year, a decrease of 10 per cent. Saskatchewan, 9,440,000 acres against 10,567,363.

The estimate from the bureau of statistics shows on the whole the condition of field crops at the end of June is very favorable, timely rains having fallen in the prairie provinces during the critical period of growth.

A telegram from the Saskatchewan department of agriculture states the growth in the province was good generally.

Freight Rates on Coal

Fuel Commissioner of Ontario Thinks Lower Railway Rates Would Solve Problem.

Toronto—Alberta coal could take the place of coal from the United States in the whole northern part of Ontario if a better freight rate could be obtained from the railways than that prevailing at the present time, according to S. A. Harrington, fuel administrator for the province, and with reasonable freight rates could be supplied to Sudbury, North Bay, points on the T. and N.O., and Soo railways, and other northern places, cheaper than American coal.

It costs about \$5 a ton less at the mines, Mr. Harrington said today, but at the present time the rate per ton on coal from Hillcrest mines, Alberta, to Sudbury, Ont., is over \$17 a ton.

A Baseless Charge.

Vancouver, B.C.—W. H. Armstrong, for three years director of coal operations for Alberta and southern British Columbia, gave a denial to the charge frequently made by Vancouver and Big Union movement that the Dominion government was forcing miners to enter a foreign organization.

Charged With Betrayal

Constantinople.—Damas Ferid Pasha, the vizier and other peace commissioners of the Turkish cabinet, were found guilty of treason and sentenced to death by the nationalist high court of justice at Angora according to advice received here. Damas and the other members of the cabinet were tried in their absence of betraying Turkey at Paris.

Irrigation in Saskatchewan

Saskatoon—At a conference of the Saskatchewan branch of the Canadian Society of Engineers here today a resolution was passed asking the government to institute the survey of land in Saskatchewan requiring irrigation.

Wheat Board Will Not Handle The New Crop

RESEARCH WORK FOR THE BETTERMENT OF SOIL CONDITIONS

Winnipeg.—The meetings of the commission of conservation, in soil fertility and soil fibre which has been in session here were conducive of much profit. Western Canada's future agricultural welfare and advancement, which impelled the conference is expected to be largely dependent on the activities of a permanent committee on research appointed by the commission as the result of the two days' deliberations. Prompted by the urging of soil and cultural experts from all parts of the Dominion, who discussed the needs of the west, and offered suggestions for betterment of soil conditions, the commission adopted a resolution at the final session which it was believed would result in carrying out the plans tentatively formulated.

The committee of experts which is to proceed under the auspices of the commission on its support "will continue and co-ordinate work which has been started on experimental farms; try out and compare methods of applying knowledge already possessed; seek other and new methods of benefit to the practical operation of farming; to obtain the best advantages."

This committee consists of J. H. Grisdale, deputy minister of agriculture of Canada; Prof. John Bracken, principal of the Manitoba Agricultural College; W. G. McKillop, superintendent of the Brandon experimental farm; Prof. E. S. Hoopes, of Olds Agricultural; W. H. Fairfield, superintendent of the Lethbridge experimental farm; Prof. G. H. Cutler, of the University of Alberta, and F. C. Nunnick, agricultural adviser of the commission on conservation, who was named secretary of the commission.

Prof. G. H. Cutler, Edmonton, in an address on "Choice of Crops and Soil Productivity," urged immediate reclamation of the land areas devastated through lack of proper fertilization. Improvement needed in seed condition in Canada was pointed out in an address by H. L. Newman, Ottawa, secretary of the Canadian Seed Grain Growers, who urged for immediate action.

"Can." he said, "requires each spring about 10,000,000 bushels of wheat to sow and plant her fields."

Fiftieth Birthday of Manitoba

Striking Record of Progress and Prosperity for Oldest Prairie Province.

Winnipeg—Manitoba, on July 15, observed her fiftieth birthday. Fifty years ago the province entered the confederation. The Duke of Devonshire, then governor-general, telegraphed Lieutenant-Governor Sir James Aikins his most cordial congratulations on the anniversary and added: "The history of the province during the last 50 years is a striking record of progress and prosperity, and the progress of the past are a guarantee of what can be accomplished in the future."

The only public event to mark the anniversary was the formal opening of the completed provincial buildings which have been under construction for the past seven or eight years.

Meighen Cabinet Complete

Ministers Have Been Sworn In With Exception of Hon. S. F. Tolmie.

Ottawa.—With the formal swearing in of Hon. P. E. Blondin, as postmaster-general, the ministry of Hon. Arthur Meighen is now complete, with the exception of Hon. S. F. Tolmie, who will be sworn in by the clerk of the privy council on his return to Ottawa, as minister of agriculture. He is at present in Saskatchewan.

Hon. P. E. Blondin takes the same position that he held in the cabinet under the government of Sir Robert Borden.

Strike Prisoner's Son Burned.

Winnipeg.—Gordon Bray, three-year-old son of R. E. Bray, one of the leaders in last year's Winnipeg strike and now serving a jail term, was burned to death here while playing with matches.

Ottawa.—The government has decided that the present wheat board will not function insofar as the wheat crop of 1920 is concerned. The marketing of this crop will revert to the usual and normal methods of pre-war times.

The government will, however, carefully watch the conditions outside of Canada and will exercise the right to proclaim the enabling legislation of last session if circumstances make it necessary so to act in the public interest. From the present point of view it is hoped that no such action will be found necessary.

Legislation passed a few weeks ago enabled the government to constitute a wheat board in continuance of the present wheat board. The wheat board, under the bill was to have well defined powers and could be called into operation by proclamation in the Canada Gazette should circumstances make it necessary.

In announcing the decision of the government, Sir George Foster, minister of trade and commerce, this afternoon made the following statement: "The government has given very careful consideration to the course to be pursued in marketing the wheat crop of Canada for 1920. As is well-known, a bill was passed at the late session of parliament enabling the government to constitute a wheat board with well defined powers, which board could be called into operation by proclamation in the Canada Gazette should circumstances make it necessary."

"The preference of the government has been for a return to normal methods of grain marketing as soon as such appeared to be warranted by conditions abroad. The three principal factors which last year decided the government to establish the wheat board were these:

"1. The fact that in Europe all buying of wheat was controlled by the various governments either separately or in concert and that the buying by our principal customers, Great Britain, France and Italy was carried on in concert. There was accordingly virtually one purchaser resulting in the practical elimination of competition. There was reluctance to enter upon purchase negotiation with the consequent danger to the early movement of wheat during the navigation season.

"2. Financial conditions which necessitated advances and credits by foreign governments and which could only be adequately met by governmental agencies in Canada in order to ensure prompt and continued movement of wheat from the commencement of harvest.

"3. The control by the United States of the purchase and sale of wheat and the fixation of prices thereof together with an embargo on imports of both wheat and flour.

These factors either do not exist or are not in force to the same extent at the present time. From the best information available it would now appear that while as far as can be ascertained, European buying will be in a greater or lesser degree controlled by the governments of practically all countries in Europe dependent upon imports of wheat, there does not seem at the present time reason to believe that the purchasing of wheat by the various governments or governmental agencies will not be made independent of each other, both as to transport and purchase, thus constituting conditions of competition that should result in a fair market value being obtained for the Canadian crop. The United States has controlled the market in grain and flour and the exchanges there are now open for trading in December and later options and there is no longer any embargo upon imports of wheat or flour. All the indications therefore are that the marketing of grain and its products in the U.S. will resume to normal methods and flour in the usual channels.

"It must be remembered, however, that United States have legislation under which control can be brought into effective force if at any time their government were to decide that national interests demanded such action.

"Under the circumstances above set forth, the Canadian government has decided to take no steps at present to proclaim the enabling act, which means that the present wheat board will not function insofar as the crop of 1920 is concerned, and that the marketing of this crop will revert to the usual and normal methods of pre-war times. The government will, however, carefully watch the conditions outside of Canada and will exercise the right to proclaim the enabling legislation of last session if circumstances make it necessary so to act in the public interest.

"From the present point of view the government hopes that no such action will be found necessary."

Have a Good Time at the Fair

Lots of Peanuts,
Candies
Fruits

Priced Moderately

Indian Head Suiting

65 cts a yard

A strong serviceable quality in pure white Indian Head. Full 28 in. wide.

White Middy Cloth

55 cts a yard

It is a full yard wide and specially good value. Fine even weave and free from dressing.

Union U. F. A. Picnic

The Union picnic representing Bentley, Spruceville, Blindman, Lakeside and Ardenale U. F. A.'s and U. P. W. A.'s was held at Gull Lake, Saturday July 10th. All locals were represented but a good number of Ardenale members were absent attending the funeral of Mrs. C. W. Tisdale of that district. At noon all were seated to a large picnic dinner, presided over by ladies from the different locals. It is needless to say all enjoyed the feature of the programme.

After tea was served, the crowd were called to the Basket Ball Court, where they enjoyed a game between Spruceville and Lakeside teams. The game was heartily entered into by both teams, and a good game played resulting in a score of twelve to eight in favor of the Lakeside girls.

The Spruceville girls then escorted the visiting team to the Lakeside Hotel for a treat. Following this, the crowd were entertained by L. M. Gault of Red Deer, who gave a very interesting and instructive talk on how by co-operation the political education and social life of our districts might be benefited. He gave the U. P. W. A. credit for being very enthusiastic along these lines, but suggested that Arm Chair members in any part of the locals were of no use—no must do his or her part.

The races were then called presided over by Mrs. Ingrida President of the Rose Leaf local.

List of races and awards as follows:
Girls 8 to 14 years.
First—Edith Randall age 13.
Second, Edna Mellan age 10.
Girls under 8 years.
1st, Edith Morris age 8.
2nd, Primrose Marquet.
Boys Three legged Race.
1st Chester Kaaha-Harry Proudfoot.
Men's Three legged race.
1st, Clarence Kaaha-Harry Stout.
Boys Potato Race.
1st Irvin Morris age 13.
2nd Leslie Boden age 14.
Girls Potato Race.
1st, Edith Roe, age 12.
2nd, Helen Randall, age 10.
A scramble for pennies was then given for the little tots.
The Basket Ball Girls Potato Race.
1st Mary Proudfoot.
2nd Irene Mitchell.

Boats were there for the use of any who wished them and as none were seen empty they must have been enjoyed.

After the races a game of baseball was played between two teams chosen from the crowd. This held the crowd until it began to grow late and all departed satisfied with the splendid time they had had, and looking forward to as good a time next year.

Blackfolds W.I.

The above was a very enjoyable picnic on Friday last at Jack Fish Lake. A large crowd turned out, and had a delightful time at that very pleasant resort. Prominent among the visitors was the District Convention, Mrs. Rainforth whose very able talk on "Thrift" was highly applauded by all. The Lacombe W. I. was represented by their President and Sec. Treas., and other ladies. Great credit is due to the management, every detail having been well planned. Special mention might be made of the sports committee who had prepared a splendid programme: Races and

Winners were as follows.

Boys Race under 10 years of age.
1st, Gordon Mathias, 50c; 2nd Jack Gregson, 35c; 3rd Carl Sorenson 25c.
Girls Race under 10 years.
1st Anne Miller, 50c; 2nd Catherine Newton, 35c; 3rd Mabel Martin.

Automobile Snag

One Gray Dort, partially new. Spare tire, chains and license. Car run only 1500 miles. Price \$1200.00. O. Boode.

6-12-No. 2062634
In the Matter of the Railway Act and in the Matter of the Right-of-Way of Lacombe and North-Western Railway Company, Across That Portion of the North East Quarter of Section Twenty-Three (23), Township Forty (40), Range Twenty-Eight (28), West of the Fourth Meridian Described in Certificate of Title No. 108 C. 37.
To Harry Henry Fry Esq., Los Angeles, California, U.S.A.
And to all others whom it may concern—

Take Notice that pursuant to the provisions of "The Railway Act" and the award made by H. G. Scott sole arbitrator appointed by order of the Honorable Mr. Justice Hyndman of date the 3rd of May 1920, the Lacombe and North Western Railway Company has made payment to the Clerk of the Supreme Court of Alberta, at Edmonton, of the sum of \$42.96 being the amount of compensation awarded by the said arbitrator with the interest thereon and has also delivered to the said Clerk an authentic copy of the said arbitrator's award.

And Further Take Notice that all persons claiming an interest in or entitled to the lands in respect of which the aforesaid award of compensation has been made are required to file their claims to the said compensation or any part thereof in the hands of the Clerk of the Supreme Court of Alberta, at Edmonton aforesaid, on or before the 30th day of July A. D. 1920.

And further take notice that the Title of the company (that is the aforesaid award) being for 1.15 acres more or less, of the lands above described, is under "The Railway Act."
Dated at Edmonton, in the Province of Alberta, this 6th day of July, A.D. 1920.
Lacombe and North Western Railway Company.
